Section 1: Getting to know you

Tell us more about your self. *

I am a 25 year old passionate and ambitious Boston City Campus I.T qualified graduate with globally recognised certifications such as; CompTIA A+ | CompTIA N+ | Microsoft Certified Professional | Microsoft Certified Systems Administrator | Microsoft Certified Systems Engineer, and I would gladly appreciate an opportunity to enhance my knowledge and abilities in the ICT sector.

What are your main strengths? *

I have good communication skills, great problem solving abilities and I get things done with little direction. I can work with many different types of people of varying personalities and skill levels. I am motivated, disciplined, and focused and I am determined to get my job done well and on time.

What are your main weaknesses? *

I pay close attention to details which does result in a higher quality of work and saves additional time down the road, though it does take more time up front and sometimes overtime.

What do you think are the characteristics that you poses that would make you the best candidate for the job? *

I believe I can add great value due to my skills and knowledge I have acquired studying and doing practical work, and I'd really love to continue to build upon my skills and grow. My drive, hardwork and consistancy speaks for itself.

List 2 (two) things that you have learned about yourself in the last year. How did you learn this information? *

Consistency: I have learned that with every important task i handle be it small or large i see to it by any means that I get it done and see it through.

Faith: Through faith and hardwork I learned that though things take time it is important to stay motivated and prepared at all times and things worked for, do manifest.

What annoys you about people or situation? What do you usually do about the situation *

I've always been able to get along with people. It does not matter how difficult some of my co-workers can be. I even manage to get along with those that I don't work with.. Getting along with others simply boils down to personality.

When you can understand and recognize other personality types, other than your own, getting along becomes that much easier. I may not get it right on the first try, but once I learn more about that person and discover their hot buttons, I won't have any problems.

Describe the situations or circumstances that bring out the best in you, your work and your behaviour? *

Positivity, Learning new things everyday and Good vibrations around me bring out the best in me, New opportunities and Good work ethic compliment my behaviour as well.

Provide information of a time when you did or said something that had a positive impact on a friend, family member, teacher or anyone else? *

Early this month of March motivating a close friend to work towards what he is extremely talented in and go for it no matter how hard it may seem to maneuver through its echelon ranks

Provide information of a time when you did or said something that had a negative impact on a friend, family member, teacher or anyone else? *

I would not know because no one confided in me if i did so

What do you think about success? *

Honestly for me personally i think success is to live a happy life and to make this world a better place for everyone. The true meaning of success goes far beyond the common definitions of success, such as having a lot of money, being wealthy, having a lot of tangibles and earned degrees. Quite the opposite: true success in life cannot be measured with the above-named factors, but instead with the amount of people that are able to live a better and more advanced life because of what you created.

What would you like to accomplish in the next 3,6,12 months? *

Great amount of eye opening knowledge and skills which i have not tapped in too yet before, Earn great attributes in my I.T career and be more open minded in the ICT Industry and of course meet and have great memories with people!

What motivates you? *

God, my family and everyday Life does it for me. I'm very results-driven. Doing a good job and achieving the desired end result is my primary motivation. While I enjoy working on a project on my own, I'm particularly motivated by the buzz of working in a team. It's very rewarding working closely with others who share the same common goal.
