

**Department of Electronic Engineering**

**TO WHOM IT MAY CONCERN**

Students studying towards the following programmes offered in the Department of Electronic Engineering are required to undertake one(1) year compulsory experiential training (Work Integrated Learning) :-

- **National Diploma : Engineering : Electrical (Light Current)**
- **National Diploma : Engineering : Computer Systems**

This is a three (3) year qualification of which two (2) years is spent at the institution completing the theoretical part. The student is required to have one (1) year Work Integrated Learning (WIL) experience which must be done in industry. This training can be completed anytime after the first semester of studies.

The generic breakdown of the type of experience the learner should be exposed is as follows: **P1**

Orientation of the company, safety and first aid, basic hand skills, use of electronic equipment, familiarization of electrical and electronic components, use of circuit diagrams in fault finding, different types of power sources, electronic communication systems/ instrumentation and control or computer system application, general administration and report writing. For the P2 breakdown, please contact the department.

Employers who can assist in providing the entire training component or part thereof are encouraged to employ these students as in-service training students.

For further information and assistance please feel free to contact the department at (031) 373 2932.

Regards,
