Section 1: Getting to know you

Tell us more about your self. *

I would have loved to talk about myself professionally but unfortunately I have nothing to tell professionally but I will tell about myself and how I am trying to better myself. I am passionate about the tech industry. I have successfully completed my Technical certification(CompTia A+) and currently pursuing MCSD certificates through their online courses(Microsoft Virtual Academy) my interests are not limited to hardware and development only, in years to come I want to get certified in the network and security field.

What are your main strengths? *

I am analytical, and a problem solver and I prioritize tasks. I love taking on problems that challenge my technical skills. As mentioned I have no professional experience but not so long ago I messed up my computer's boot sector, this was my first encounter, it me awhile to fix it but I managed.

What are your main weaknesses? *

With tasks that require a lot of thinking I tend to "get lost in my thoughts" by that I mean my thinking will be based on the task or problem before hand but my thinking will be shifted to something else.

What do you think are the characteristics that you poses that would make you the best candidate for the job? *

I am a hard worker, I am loyal and honest, I take full responsibility for my actions, I work well with a team and individually, I am a self starter and I know how to and where to look for technical solutions for the problems I may not not be familiar with and I am respectful towards anyone regardless of their sexual orientation, race or religion.

List 2 (two) things that you have learned about yourself in the last year. How did you learn this information? *

If put my mind to it, I can achieve it. Last year i took an online course of introduction to programming, I completed the course.
Time management, while in college I used to be late most of the time, I realized this was going to be bad habit that will have an impact on me in a long run professionally.

What annoys you about people or situation? What do you usually do about the situation *

People that don't want to be told they are wrong. I try to make the person listen first and then tell them why they are wrong while providing facts.

Describe the situations or circumstances that bring out the best in you, your work and your behaviour? *

Achieving the desired end results, the behaviour depends in the environment I'm in or if accomplished the result alone or with a team. Alone, a little scream of "yeah" or a fist pump will do but then with a   team it different a scream of "yes we did it" and lots of acknowledging and handshakes.

Provide information of a time when you did or said something that had a positive impact on a friend, family member, teacher or anyone else? *

A close friend just graduated, she failed her first year. After she told me the good news about her graduation I told her I admired her spirit of not giving up when things didn't go accordingly.

Provide information of a time when you did or said something that had a negative impact on a friend, family member, teacher or anyone else? *

I was in a break up "phase" with my ex I told her she was damaged goods and anyone who will see any value in her would be stupid or really out of options.

What do you think about success? *

For me success is achieving ones goals and being independent, being in control of my life without anyone telling me what to and what not to do.

What would you like to accomplish in the next 3,6,12 months? *

would like to be a Microsoft Certified Solution Developer

What motivates you? *

Doing a good job and achieving the required results.
